

# UTC SCOOT Foundation Course

## Version 39 Onwards

### Online

Duration: 30 days

Price: £1150 (exc. VAT)

#### Overview

This course NEWLY UPDATED TO COVER YUNEX TRAFFIC Version 39 covers all aspects of SCOOT from first Principles through Design and Implementation and On Street Validation and Calibration. It is based on the Siemens UTC SCOOT system. Note that there are later versions of SCOOT with version 41 following version 39 and an new product UTC UX. The systems are similar in many respects but it may be worth checking with us to make sure the course meets your current needs.

The course equates to around 3 days face to face training with around 9 hours of recorded material and 18 Exercises to put your learning into practice

The course is accessed on a self-paced basis with typically 30 days access being given to the pre-recorded material and downloadable content. The course is supported with printed course material and an invitation to a live tutorial where questions be answered. Further support can be accessed via e mail.

#### Who Should Attend

Attendees should have a good understanding of traffic signal terminology and operation, typically gained through experience or by attending training such as the IHE Traffic Signals or JCT Introduction to Traffic Signals Courses.

In addition attendees with access to a working UTC SCOOT system will benefit most from the course.

#### Pre-requisites

Good understanding of UK Traffic Signals Terminology and Operation
